PROFESSIONAL SUMMARY

Motivated Software Engineering undergraduate at SLIIT with proven experience delivering production-grade web applications for real clients. Proficient in full-stack development using Laravel, React.js, Node.js, Next.js, and Spring Boot. Experienced in microservices architecture, mobile apps, and AI-integrated platforms. Strong UI/UX sensibility backed by Figma prototyping and AI-assisted design. Solid mathematical foundation and strong Git & GitHub version control discipline.

EDUCATION

BSc (Hons) in Information Technology

Specializing in Software Engineering

SLIIT | CGPA: 3.2

INTERNSHIP EXPERIENCE

Software Engineering Intern — QMatrix AI, UK (Remote, 6 Months)

- Delivered RentalPro & QuickPlate for UK clients using Laravel, React.js, MySQL, DigitalOcean.
- Implemented auth, RBAC, admin dashboards, and Selenium automated testing.
- Followed Agile/Scrum, collaborated remotely and met all production deadlines.

PROJECTS

[Real Client — QMatrix AI] RentalPro – Rental Equipment Platform | *Laravel, React.js, MySQL, DigitalOcean*

- Full-stack system with equipment scheduler, booking flow, settlement management, and admin dashboard.
- Deployed on DigitalOcean with Selenium-based automated testing and role-based access control.

[Real Client — QMatrix AI] QuickPlate – Food Ordering Dashboard | *Laravel, React.js, MySQL*

- Responsive food ordering dashboard with loyalty programs, analytics, and multi-tier user workflows.
- Role-based access from customer to admin with modern UI/UX and customer review management.

CareerConnect AI – Intelligent Job Portal | *React, TypeScript, Spring Boot, Apache Kafka, Docker, MySQL*

- Microservices platform (Auth, Job, Application, Notification, Profile) with Docker Compose & Spring Cloud Eureka.
- AI Match Prediction engine parsing CVs vs job requirements; Kafka-driven SMTP notification engine.

AI Resume Generator | *Next.js, MongoDB, AI Integration — Campus Project*

- Figma UI/UX prototype with AI-generated design concepts; Next.js app with real-time AI resume generation.
- MongoDB for persistent storage; AI API integration for intelligent content suggestions.

Beauty Care E-Commerce | *Next.js, PostgreSQL, Neon (Serverless), Tailwind CSS*

- Full-stack e-commerce platform on Vercel; Neon serverless PostgreSQL; Figma-designed responsive UI.

SWAG Clothing E-Commerce | *MERN Stack — MongoDB, Express.js, React.js, Node.js*

- Full-stack clothing store with cart, authentication, order management, and modern responsive UI/UX.

Food Donor Mobile App | *Flutter, Firebase, AI Integration*

- Cross-platform app with AI food condition analysis, smart matching, and location-based donor discovery.

TECHNICAL SKILLS

Languages	Java, JavaScript, TypeScript, Python, HTML/CSS, PHP, C/C++, Kotlin
Frameworks	Spring Boot, Laravel, React.js, Node.js, Express.js, Next.js, Flutter, Tailwind CSS
Architecture	Microservices, REST API, Event-Driven (Apache Kafka), MVC, Spring Cloud Eureka
Databases	MySQL, MongoDB, PostgreSQL, Supabase, Neon, Oracle
UI/UX Design	Figma, Wireframing, Prototyping, AI-Assisted Design, Responsive & User-Centered Design
Deployment	DigitalOcean, Docker, Docker Compose, Vercel, CI/CD Pipelines

Version Control	Git, GitHub — branching, PRs, code review, project management
Testing	Selenium, Unit Testing, Integration Testing, TDD
Mathematics	Strong foundation — algorithms, logic, discrete mathematics, data structures
Tools	VS Code, IntelliJ IDEA, Android Studio, Figma, R Studio

SOFTWARE ENGINEERING PRACTICES

- Object-Oriented Programming (OOP)
- Agile Software Development & Scrum
- Software Development Life Cycle (SDLC)
- Version Control with Git & GitHub
- RESTful API Development
- Database Design and Management
- MVC & Microservices Architecture
- Test-Driven Development (TDD)
- Unit Testing & Integration Testing
- Software Documentation
- Code Review and Debugging
- Requirements Analysis
- UI/UX Design Principles
- CI/CD (Continuous Integration & Deployment)
- Secure Coding Practices
- Responsive Web Development
- Mathematical Problem Solving
- Git Branching & Pull Request Workflows
- GitHub Project Management
